### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Lee on 7/14/05.

The application has been amended as follows:

#### IN THE CLAIMS:

In claim 1, line 7 (last line), after the phrase "trench etch", insert ", wherein the providing the combination via plug deposition to form plugs in the vias and trench etch, comprises providing a plug forming gas and an active etchant in the plasma process chamber simultaneously and forming a plasma from the plug forming gas and the active etchant".

Cancel claim 20.

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a process including the step of simultaneously supplying plug forming gas and an active etchant in the plasma chamber and forming the via plug and etching the trench simultaneously as the context of claims 1 and 7.

The prior art also does not teach a process including the step of forming the via plug and etching the trench in the combination step by providing a cyclic process with a via plug forming phase and the trench etching phase as the context of claims 8 and 21.

3. Closest prior art Moon et al (US 2001/0021581) teach a process including the step of forming via plug by spin coating and subsequently trench etching (paragraphs 0029-0033).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
